EDUCATION

THE ISLAMIA UNIVERSITY OF BAHAWALPUR

BACHELORS OF COMPUTER SCIENCE

CGPA: 3.3

2021-03-30 - 2025-01-14

Bahawalpur, Pakistan

EXPERIENCE

EARENDEL TECHNOLOGIES | FULL-STACK DEVELOPER

Islamabad, Pakistan | August 2025 – Present

- Built and maintained full-stack web applications using React.js, NestJS, Node.js, and PostgreSQL for production-grade platforms
- Designed and implemented scalable RESTful APIs with NestJS serving both mobile applications and admin panels
- Developed feature-rich React.js admin panels including dashboards, user management, subscription tracking, heatmaps, and custom notification systems
- Integrated AI/GPT APIs to power intelligent chatbots, image analysis, and data-driven insights within web and mobile ecosystems
- Containerized applications with Docker and deployed to AWS (Elastic Beanstalk, S3) ensuring high availability and scalable infrastructure
- Collaborated with cross-functional teams in agile sprints to deliver end-to-end features from API design to production deployment

ENIGMATIX | FRONT-END DEVELOPER

Bahawalpur, Pakistan | 2022 August – August 2025

- Translated Figma designs into responsive interfaces using React.js across 5+ enterprise applications.
- Developed 25+ reusable UI components.
- Implemented modular architecture improving page load performance. Integrated 50+ API endpoints using React Query.
- Employed Redux Toolkit for state management.
- Improved performance through code restructuring and browser optimizations, implemented lazy loading and code splitting, achieved high Google PageSpeed Insights scores.
- Reduced UI bug reports and resolved complex bugs.
- Collaborated with UI/UX and backend teams, documented changes, and participated in agile sprint planning and code reviews.

ENIGMATIX | WEB DEVELOPER (INTERN)

Bahawalpur, Pakistan | 2022-08-01 – 2022-10-31

- Frontend development internship building responsive web interfaces using HTML, CSS, JavaScript, React, and Next.js.
- Built and styled 10+ UI components, wrote unit tests for 10+ React components using Jest achieving high coverage, assisted in integrating RESTful APIs with React Query, utilized Redux Toolkit for state management, contributed to a client-facing web application under agile sprints, and collaborated to debug and optimize frontend code reducing load times.

SKILLS

PROGRAMMING LANGUAGES	HTML, CSS, Javascript, Typescript
LIBRARIES/FRAEMWORKS	React, Next.js, Electron.js, Redux Toolkit, React Query, Context API, GSAP, Jest, Tailwind CSS, Framer Motion, FastAPI
TOOLS / PLATFORMS	Git, Github, Gitlab, Figma, Slack, Clickup, Jira, ESLint, Docker, Docker, AWS, Elastic Beanstalk
DATABASES	Firebase, Postgres

PROJECTS / OPEN-SOURCE

AGTRINSIC FULL-STACK AGRICULTURAL INTELLIGENCE PLATFORM React.js, TypeScript, NestJS, Node.js, PostgreSQL, Docker, AWS S3, Elastic Beanstalk, Google Earth Engine, GeoTIFF, NDVI, GPT API, REST APIs

Full-stack precision agriculture platform with a NestJS REST API serving a mobile app and React.js admin panel, deployed via Docker on AWS Elastic Beanstalk with S3 storage. Integrated Google Earth Engine (GEE) via FastAPI to fetch satellite imagery and compute NDVI for crop health assessment; processed GeoTIFF raster files to generate geo-referenced field maps powering five analysis modules: Simple Analysis, Deficiency Map, Trait Selector, Disease Pressure, and Yield Prediction. Admin panel covers Dashboard, User & Subscription Management, Analysis HeatMap, Help & Support, and Custom Push Notifications. Includes a GPT-powered Agentic Chatbot with voice input for real-time farmer advisory

AMICUS AI-POWERED CIVIC ENFORCEMENT APP React, TypeScript, Node.js, NestJS, PostgreSQL, GPT Vision API, AWS S3, Docker, Tailwind CSS

Amicus is an AI-based civic platform that enables users to capture and report vehicles violating traffic and parking laws, including wrong parking, wrong-lane violations, and other illegal activities. Users submit photos of violations through the app, and an AI model powered by GPT Vision automatically analyzes the images to detect and validate the nature of the infringement. If a case is confirmed valid, the reporting user is rewarded with a monetary bounty and their in-app XP increases, creating a community-driven enforcement ecosystem. The platform handles end-to-end case management including image storage, AI evaluation, reward disbursement, and user reputation tracking.

WOOVCLUB MANAGER PLATFORM React, Typescript, Firebase, React-hook-form, Redux Toolkit, React Query, React Router, GSAP, Tailwind CSS, React i18n, Yup, Framer Motion, ZegoCloud, ESLint, Lazy Loading

Web-based management system for the Woovclub mobile application featuring role-based management, court and event management, AI-powered ticket management, built-in chat, coach and course management, and integrations between web platform and mobile app.

ZOERVERSE VIRTUAL EVENTS PLATFORM Next.js, GSAP, Tailwind CSS, Next18n

Design and management interface for a metaverse application focused on virtual events, enabling creation and customization of virtual environments, event scheduling and interactive features to enhance engagement.

FID WORLD | UNIFIED WEB PLATFORM Next.js, Tailwind CSS

Showcase website for Zoaverse and Woovclub applications focusing on designing, animating and developing a visually engaging user interface to highlight features of the interconnected ecosystems.

CERTIFICATIONS

- React-Basic Certificate - HackerRank
- Responsive Web Design - FreeCodeCamp
- Javascript-Basic - HackerRank

HONORS & AWARDS

- Interface Excellence Award (Enigmatix 2025)
- Excellence Achievement Award (Enigmatix 2023)
